A Scalable Approach to Enterprise Risk Management Using BitSight Security Ratings

Your Speakers Today

Stephen Boyer is co-founder and CTO of BitSight Technologies. Previously, he was president and co-founder of Saperix. He also led R&D programs at MIT Lincoln Laboratory, and he designed, developed, and tested products at Caldera Systems. Boyer holds a Bachelor's Degree in computer science from BYU and master of science in engineering and management from MIT.

Jasper Ossentjuk joined TransUnion in December 2014 as their Global Chief Information Security Officer and Senior Vice President, leading their information security across 31 countries and protecting over a billion consumer files and 30+ petabytes of data. He has 20 years of experience as an IT and Information Security leader. Jasper holds a Master's Degree in Project Management from George Washington School of Business, a Bachelor's from the University of Arizona, and is CISSP certified.

What are the most pressing cybersecurity challenges that the Enterprise Security Ratings Platform has helped you solve and how has it helped you solve them?

Gaining Support from the Business

How did you incorporate BitSight into your own risk management program at TransUnion?

What challenges did you overcome to get support from senior executives and get this award-winning risk rating program off the ground?

Translating Cyber Concepts Into Business Context

What role do security ratings play in helping you translate complex security topics into simple business context for external stakeholders?

The Future of the Enterprise Security Ratings Platform

What are next steps for your Enterprise Security Ratings Platform? Do you have any plans on expanding your usage of the platform?
