

Work Smart and Stay Safe with Google Chrome Enterprise

Chester Lui
Head of Americas, Chrome Customer Engineers

February 27, 2018

Security is a moving target

On average, employees use **22 cloud-based apps and 3 devices** to do their job

98% of the Fortune 500 were affected by **Malware** in 2017 and 69% by **phishing**

Chrome Enterprise protects businesses at every cloud entry point

Secure by design

Proactive protections help you anticipate the evolving demands of doing business in an always-connected, mobile world.

Intelligent security

Granular policy controls prevent unauthorized access and control user permissions across your network.

Future-proofing

Continuous vulnerability management keeps you a step ahead of emerging threats.

Google's internal model for providing tiered access

	Cafe menu	Paychecks	Code
 Fewest controls			
 Tighter controls e.g. application whitelisting			
 Tightest controls e.g. application whitelisting; full logging and forensic capabilities			

Protect users and data with multilayered, interlocking defenses

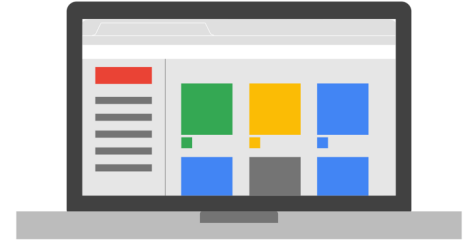

Browser

Protect users with Safe Browsing and sandboxing of tabs

Devices

Max protection and reduced risk with hardware security module

Firmware

Google-designed firmware with Verified Boot

OS Platform

Secure from boot up to shutdown with privilege separation, sandboxing, encryption and auto updates

Applications

Google's server-side malware detection prevents breaches

Monitor and secure your enterprise with flexible Chrome Enterprise management options

Policies

Ensure employee compliance with over 200 security policies, easy provisioning and remote lock via Chrome Enterprise

IT Manager

Managed Apps & Extensions

Managed Policy for App Management

Third-Party Integration

Manage via VMware Airwatch & Microsoft Active Directory

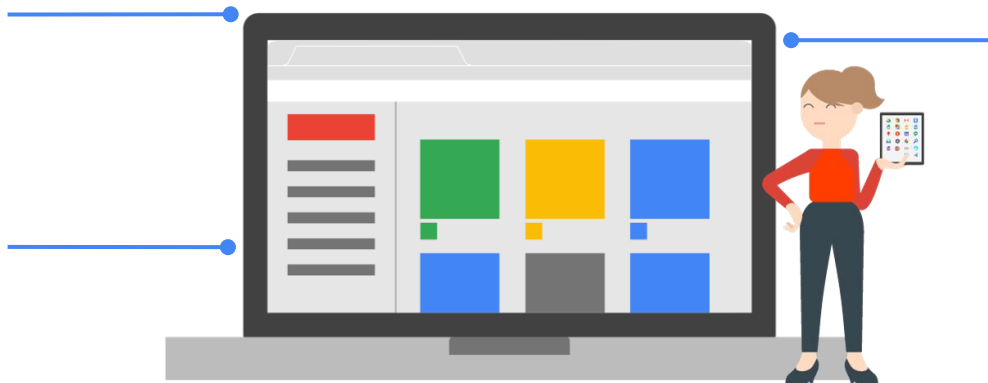

Safeguard every single user, every single session

Background checks and updates

Background auto-updates provide ongoing protection, without interruptions.

Automatic upgrades

New features and Google upgrades every six weeks

Ephemeral Mode

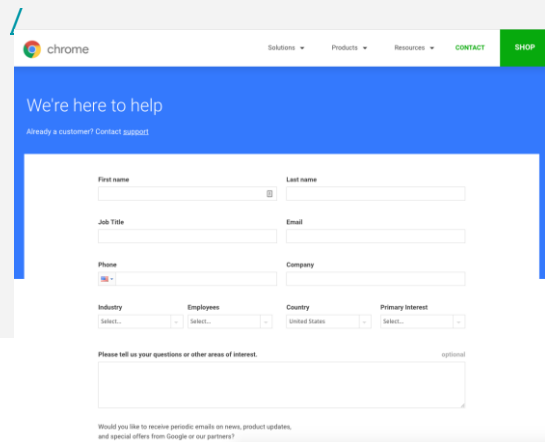

Secure device by deleting user profile upon exiting of session.

Work smart and stay safe with Chrome Enterprise

Learn more about Chrome OS

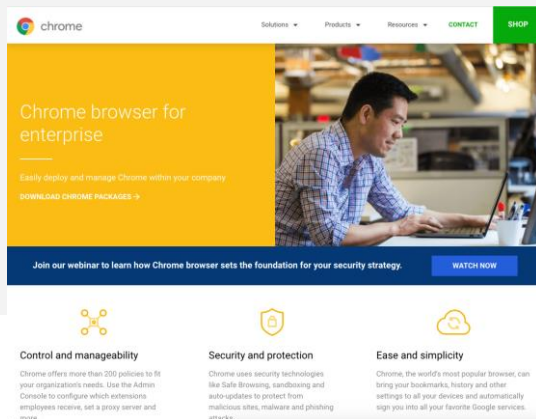

enterprise.google.com/chrome/contact

The screenshot shows the Chrome Enterprise contact form. At the top, there's a navigation bar with 'chrome' logo and links for 'Solutions', 'Products', 'Resources', 'CONTACT', and 'SHOP'. Below the navigation, a blue header says 'We're here to help' with a sub-link 'Already a customer? Contact support'. The main form area has fields for 'First name', 'Last name', 'Job Title', 'Email', 'Phone', and 'Company'. There are also dropdown menus for 'Industry', 'Employees', 'Country', and 'Primary Interest'. A text area at the bottom is labeled 'Please tell us your questions or other areas of interest.' and 'optional'. At the very bottom, there's a checkbox for 'Would you like to receive periodic emails on news, product updates, and special offers from Google or our partners?'.

Download & manage Chrome Browser

chrome.com/enterprise

The screenshot shows the Chrome Enterprise landing page. It features a navigation bar with 'chrome' logo and links for 'Solutions', 'Products', 'Resources', 'CONTACT', and 'SHOP'. The main content area has a yellow background with the text 'Chrome browser for enterprise' and 'Easily deploy and manage Chrome within your company'. Below this is a 'DOWNLOAD CHROME PACKAGES' link. A photo of a man working on a laptop is on the right. A blue banner at the bottom says 'Join our webinar to learn how Chrome browser sets the foundation for your security strategy.' with a 'WATCH NOW' button. Below the banner are three columns of content: 'Control and manageability' (with a gear icon), 'Security and protection' (with a shield icon), and 'Ease and simplicity' (with a cloud icon). Each column has a brief description of the feature.

Come and meet
the Google team

Thank you
